EDUCATION

BITS-Pilani, Goa Campus

Goa, India

Master of Science, Mathematics | Bachelor of Engineering, Electronics and Communication - 6.00

Nov. 2022 – May 2027

EXPERIENCE

Full Stack Development Intern

May 2024 – July 2024

Le'Nest Hospitals

Mumbai

- Built a website for digitization of prescriptions using the **Spark NLP Machine Learning** library (HIPAA compliant)
- Set up a server with secure logins for the patients and doctors both to access past prescriptions and lab reports
- Automated majority of the prescription making process using a **custom-made prescription builder** with direct uploads to the server
- **Tools/Technologies Used:** C++, Python, Machine Learning, Vercel

PROJECTS

Network Packet Delay Analysis Platform | *React, D3.js, Flask, PostgreSQL, Render* [Link](#)

July 2024 - Oct 2024

- Developed a **full-stack web application** to analyze network packet captures (.pcap, .pcapng, .etl, etc.), computing latency, jitter, and packet loss using **Python** and **PyShark**.
- Built a **scalable backend** with **Flask** and **REST APIs**, enabling real-time packet analysis, protocol/IP filtering, and optional PostgreSQL-based data persistence.
- Designed an interactive **React + D3.js dashboard**, visualizing network performance metrics to help identify latency patterns and troubleshoot network issues efficiently.

Standup Prep - AI Scrum Master | *Next.js, Supabase, Vercel, Gmail SMTP* [Link](#)

Oct 2025 - Jan 2026

- Engineered a **full-stack work journal** enabling users to upload daily tasks and receive **automated AI-generated summaries** daily before their scrum.
- Built on a **Supabase backend** and integrated with **Gemini API** to auto-extract task description from user uploaded screenshots, to make logging work easy along with an **email scheduling system**.

Personal Portfolio — Built From Scratch | *HTML, CSS, JavaScript, Git/GitHub, Vercel* [Link](#)

May 2026 - Present

- Designed and built a fully responsive personal portfolio from scratch using **vanilla HTML, CSS** (Flexbox/Grid, mobile-first media queries), and **JavaScript**.
- Implemented interactive UI features, including a dark/light mode toggle and mobile navigation menu, using vanilla JavaScript and **CSS custom properties**.
- Verified functionality through extensive simulation and test cases, debugging pipeline behavior and validating instruction-level correctness across multiple scenarios and aspect ratios.

RESEARCH EXPERIENCE & EXTRA CURRICULARS

Review Paper on Mental Health Management Through Smart Devices/Wearables [Link](#)

Aug 2025 - Dec 2025

- Co-authored with Prof. Anupama Karuppiah proposing an integrated hardware-software framework for next-generation mental-health wearables, synthesizing advancements in multimodal biosensing and edge AI for real-time analysis.

Mathematical Modeling of Vaccine Hesitancy in India

May 2024 - Aug 2024

- Co-authored with Dr. Mukesh Gupta; **mathematical model** made to take into account various reasons for vaccine hesitancy and give a **cost-benefit analysis** to increase intake.

TECHNICAL SKILLS

Languages: HTML, CSS, Python, MATLAB, C++, Verilog, Assembly

Developer Tools: React, Next.js, D3.js, Git/GitHub, ROS, Gazebo, Flask, REST APIs

Data/Modelling: Excel, Financial strategic modelling frameworks, DCF Valuation, Statistical Modelling

Devops & Infrastructure: Git/GitHub, Docker, Vercel, Render, Supabase, PostgreSQL
